

California-based Healthcare Company Now Offering No-Cost Healthcare Nationwide

OXNARD, Calif. – June 16, 2020– In response to the COVID-19 pandemic, California-based healthcare company, [WorXsiteHR](#), has expanded the availability of its HealthWorX no-cost healthcare plan nationwide to employers with as few as 100 employees. Designed to enable employers to provide all workers – including low-wage and part time employees - with ERISA- and ACA-compliant healthcare, HealthWorX closes a significant gap in worker coverage and puts money back in the pockets of both employers and employees.

Using an innovative approach and making full use of mobile devices, HealthWorX gives all workers access to minimum essential care, telemedicine, pharmacy, and wellness. Originally available in California, the company has responded to the demand by employers with low wage workers across several industries, to offer all employees access to healthcare nationwide. As of today, HealthWorX is available in all 50 U.S. states.

“The current healthcare landscape is incredibly complicated and a constant discussion point for everyone, and even more so now with the COVID-19 pandemic,” said Dr. John Zabasky, Chief Executive Officer of HealthWorX. “The full impact the pandemic will have on health insurance programs is unknown, but there is an expectation that premiums are going to skyrocket, thrusting a new burden on employers and creating greater uncertainty for employees. We’re proud to offer simple and affordable healthcare that will address all of those concerns while cutting costs for employers and employees alike.”

Facts about HealthWorX:

- HealthWorX cares about the wellbeing of all employees. It doesn’t matter if employees are full-time or part-time, have a low-wage, or are U.S. citizens or not – all employees and their families deserve access to health benefits at no cost.
- HealthWorX offers unlimited, preventative and sick visits with no deductibles and small copays; telemedicine for employees and dependents, full wellness programs, and pharmacy benefits through GoodRx.
- By using this program, CEOs and franchise owners save approximately \$35 per month per participant. Meaning, that if an employer has 1,000 employees on the program, that employer can save \$35,000 per month or \$420,000 a year in FICA.

“HealthWorX was developed on the principle that all employees, no matter if they are low wage or part time workers, should have access to affordable healthcare,” said Sharon Rowell, President at WorXsiteHR. “In addition, to compete in today’s marketplace, maintain compliance with ERISA and ACA rules and regulations, as well as abiding by existing labor laws, a company must have access to a single integrated system that provides functionality and security to assure both compliance and reliability which we’re proud to provide to our customers in all 50 states.”

About HealthWorX:

HealthWorX is a new kind of health insurance plan that uses an innovative approach and technology platform. The plan is committed to providing access for all employees, including low-wage and part-time employees, to ERISA and ACA-compliant healthcare at no cost. [WorXsiteHR](#), a third-party administrator, manages the plan and partners with [TeledocX International](#) to provide telemedicine doctors. Working with WorXsiteHR and TeledocX International is [Xtension Health](#), a non-profit organization, which provides wellness services and subsidizes the program. Together, the three comprise HealthWorX.
